SHAILESH JHA

Bengaluru, India | shajha1309@gmail.com | +91 951-3217-674 | linkedin.com/in/jhashail

Professional Summary

Senior Technical Writer with 9 years documenting APIs, SDKs, SaaS products, and cloud infrastructure. Built Gupshup's technical writing function and developed Nutanix's highest-adopted internal AI drafting agent. Combines hands-on content validation, strong editorial judgment, and Docs-as-Code expertise to produce accurate references and tutorials for developers and AI-powered support systems.

Technical Skills

Documentation: Developer guides, API and SDK references, conceptual documentation, tutorials, troubleshooting, information architecture, editorial review.

APIs and technical validation: REST APIs, OpenAPI/Swagger, Postman, Redoc, JSON, YAML, OAuth, webhooks, CLI; Java and SQL fundamentals.

AI-assisted workflows: Glean AI, Gemini, Agentforce, NXpert, RAG, prompt engineering, source-grounded content evaluation, human-in-the-loop review.

Docs-as-Code and platforms: Git, Markdown, GitHub Actions, CI/CD, ReadMe, Docusaurus, Salesforce Knowledge, Confluence, Jira.

Cloud and infrastructure: AWS (EC2, IAM, S3), Nutanix AOS, Prism Central, Nutanix Cloud Clusters, hybrid cloud.

Work Experience

Nutanix | *Senior Technical Content Engineer* *Jul 2025 - Present*

- Built and deployed Docutanix, an AI agent that converts support cases and engineering discussions into structured technical drafts. Reached 3,605 runs across 263 users, saving an estimated 20 to 30 minutes per drafting session.
- Evaluated Glean, Gemini, Agentforce, and NXpert by testing AI-generated technical instructions against source content, identifying hallucinations and terminology errors, and recommending improvements to prompts and review workflows.
- Established four documentation guides covering knowledge articles, Confluence, accessibility, and technical training. Developed 30+ guidance modules to standardize authoring and reviews across a knowledge base of more than 9,000 articles.
- Partnered with engineers to validate AOS, Prism Central, and cloud infrastructure documentation; identified inaccurate encryption guidance associated with production incidents and coordinated corrective updates.
- Designed a Docs-as-Code proof of concept connecting Git and Markdown authoring with Salesforce Knowledge, covering automated validation, version control, and publishing synchronization; presented feasibility and ROI findings.
- Approved 874 knowledge articles in H2 FY26, representing 15% of published KB volume, with no individual SLA misses. Contributed to reducing average daily approval backlogs from 250–300 to 50–100 articles.
- Authored security workaround and AWS i3.metal end-of-life migration guidance, and coordinated approximately 16 release-readiness articles for NDB 2.11, supporting accurate customer self-service.

Work Experience (Continued)

Gupshup | *Lead Technical Writer* *Apr 2022 - May 2025*

- Founded the technical writing function, defining documentation architecture, authoring standards, review processes, and reusable templates; promoted from Senior to Lead Technical Writer.
- Authored REST API references, SDK guides, authentication and webhook documentation, integration tutorials, and troubleshooting content for Gupshup's conversational AI and messaging platform.
- Worked with engineers and product managers to research new features, validate API requests and responses, clarify error behavior, and test documented integration steps before publication.
- Rebuilt the developer documentation portal using ReadMe, Git, and Markdown, improving navigation, content reuse, and the organization of references, quickstarts, and conceptual guides.
- Implemented GitHub Actions-based Docs-as-Code publishing and used ReadMe Analytics, Hotjar, and developer feedback to prioritize documentation improvements across product releases.

Rocket Software | *Information Developer II* *May 2021 - Apr 2022*

- Wrote configuration guides, API and CLI references, integration procedures, and conceptual documentation for enterprise infrastructure and hybrid cloud products.
- Collaborated with Engineering and QA to research product behavior, validate technical procedures, and correct documentation defects before release.
- Improved information architecture with reusable topics, technical diagrams, and context-sensitive help to make complex workflows easier to follow.

Adobe | *Social Support Consultant* *Jul 2019 - May 2021*

- Created and updated installation guides, troubleshooting articles, product help content, and release notes based on technical support issues and product changes.
- Worked with support engineers and content teams to verify solutions, identify recurring documentation gaps, and turn customer feedback into clearer self-service guidance.

Amazon | *CS Associate (E)* *Oct 2017 - Jun 2019*

- Authored knowledge articles, FAQs, and troubleshooting guides that explained customer issues and AWS concepts including IAM, EC2, and service limits.
- Validated troubleshooting steps with support teams and used recurring customer questions to identify gaps in internal knowledge resources.

Education & Certification

Bachelor of Technology, Computer Science Engineering CGPA: 7.38
West Bengal University of Technology, Kolkata

Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI 6.10)
